

Public Arts Commission Agenda Supplement

Meeting Date:

March 13, 2024

Item:

Presentation by James Totulis for discussion only regarding a wall art project at the Raue Center For The Arts

Recommendation:

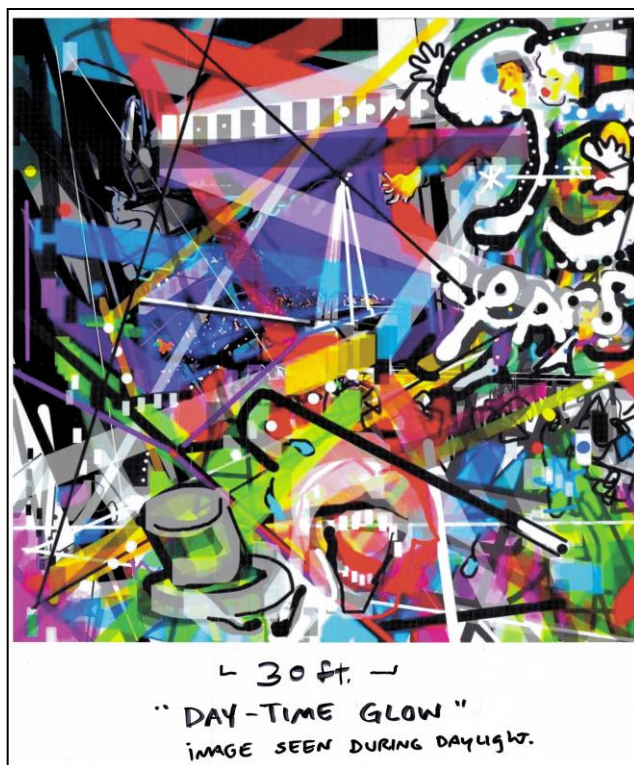

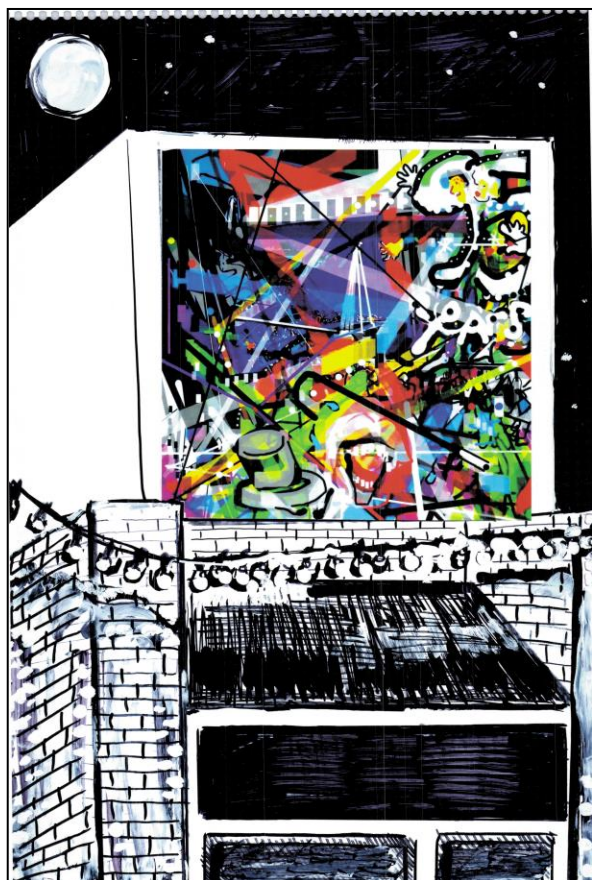

Motion to recommend as an action item at a future meeting

Contact:

Katie Rivard, Assistant City Planner

Background:

Mr. James Totulis is requesting a wall art project at the Raue Center For The Arts. The wall art would be an all-weather, vinyl 30'x30' print on the north wall of the Raue Center building. The project would include the installation of an aluminum track system adhered to the cement wall. The proposed art work would have both a daytime and nighttime glow best seen during the Spring, Summer and Fall months. Per Mr. Totulis, the benefits are "from ice cream cones to outdoor day and night activity family and friends can enjoy some vibrant geometry of color and dramatic spot light adventure". Mr. Totulis obtained a quote from Fast Signs for approximately \$7,000 for the installation and dismantle disposal.

Please note, internal sign illumination in the Downtown District requires a Special Use Permit.

Request:

To complete a wall art project at the Raue Center For The Arts. The recommendation would be placed as an action item for a future meeting.
