

#2012-35

**Landover Corporation Apartment Housing
Project Review for Planning and Zoning Commission**

<u>Meeting Date:</u>	May 16, 2012
<u>Request:</u>	Conceptual PUD review for an 84-unit multi-family apartment development
<u>Location:</u>	Main Street and Teckler Boulevard (adjacent to Immanuel Lutheran Church)
<u>Acreage:</u>	Approximately 5.6 acres
<u>Existing Zoning:</u>	R-2 Single Family Residential
<u>Surrounding Properties:</u>	North: R-2 Single Family Residential South: B-2 PUD General Commercial (The Commons) East: R-2 Single Family (portion of lot to be subdivided from this site) West: R-2 Single Family Residential (Immanuel Lutheran Church)
<u>Staff Contact:</u>	Elizabeth Maxwell (815.356.3615)

Background:

- The property is an existing approximately 12-acre lot, which is proposed to be subdivided into two lots. The first lot would be 5.6 acres for this project. The second lot would be approximately 6.4 acres with an unknown use.
- The site plan illustrates 4 buildings, (2) 20-unit buildings and (2) 22-unit buildings.
- The project is a workforce housing apartment complex. Workforce housing helps stabilize the daytime and nighttime population fluctuation.
- The petitioner is requesting a Conceptual PUD review.

Development Analysis:

Land Use/Zoning

- The site is currently zoned R-2 Single Family Residential, which allows 4.15 dwelling units per acre.
- The land use map shows the area as Urban Residential, which is planned for 1-4 dwelling units per acre.

- Previous similar projects reviewed were proposed in business areas. The request for those included a Use Variation, as changing one piece of commercial property in a commercial area would be seen as spot zoning and not practical if the residential use were to go away. This proposed site is zoned residential so it is logical to zone the property for the appropriate residential density; hence the rezoning and Comprehensive Land Use Amendment necessity.
- This project would require a rezoning to R-3B Multi-Family, which allows up to 9 dwelling units per acre.
- It would also require a Comprehensive Land Use Map Amendment from Urban Residential to High Density Residential. High Density Residential permits 6-10 dwelling units to the acre.
- 15 dwelling units to the acre are proposed, a density bonus would need to be granted.
- The proposed project is adjacent to the Immanuel Lutheran Church and school, a retail shopping area and near the MCCD Prairie Trail.

Site Layout

- There are (4) 3-story apartment buildings oriented around the perimeter with parking in front and to the sides.
- In the center of the parking area is an area of open space planned for a tot lot.
- An additional open space area is planned along the curve of Teckler Boulevard.
- Two entrances to the site are proposed off Teckler Boulevard.

Building Elevations

- The building is comprised of brick and siding with an asphalt roof.
- Other architectural details include shutters on a few windows and headers and sills around all of the windows.

Parking

- Multi-family housing requires 1.75 spaces per each 1 bedroom unit and 2.25 spaces per each 2/3/4 bedroom unit. The bedroom mix cannot be determined from the information provided.
- Parking is shown at 173 spaces, all as surface parking lots.

The following comments are for discussion and consideration in future submittals:

1. The site is zoned R-2 single-family. This project would require a rezoning of R-3B PUD and a Comprehensive Land Use Plan Amendment. Is this site appropriate for this type of development?
2. A density bonus would need to be granted. The City's UDO outlines three processes for receiving a density bonus:
 - i. Through the PUD process. "In specific instances, encouraging high quality design and environmentally sensitive development by allowing increases in residential density or non-residential square footage where such increases are

- justified by superior design or the provision of additional amenities such as public open space.” The requirement has not been demonstrated by this development.
- ii. Through the Inclusionary Zoning provision. “Inclusionary Dwelling Units (IDU’s) at least 10% of the total number of units proposed and not more than 30% of the total number of units proposed for a project shall be IDU’s.” Anything less or anything more would not create a good mix of housing choices. This project is more than 30% it is 100% of the units, so it would not qualify for the density bonus.
 - iii. Transfer of Development Rights. “The 30% maximum may be exceeded if a Transfer of Development Rights (TDR) Agreement has been presented to the City.” This requirement has not been demonstrated by this development.
3. A 20-unit building is a large building; the building should be designed to better break up the mass.
 4. Sidewalk connections. Sidewalks are shown along this development, but they do not connect to any existing sidewalks leading to Main Street. These sidewalk connections should be installed. The sidewalk connection south to the Commons should line up with the existing sidewalk stub.
 5. A future street is shown from the Walkup Road stub off Main Street. Since Teckler Boulevard does not provide direct access to Main Street, this roadway be constructed as part of this development.

CITY OF CRYSTAL LAKE DEVELOPMENT APPLICATION
